Electronics and Communications Engineering graduate with proven software development, teaching and growth. Trying to impact the world in a positive way, one step at a time.

Work History

2022-01 -

2022-02

Growth Product Manager Intern

Be Zen, Remote

- Brainstormed growth experiments and classified them based on the ICE framework and defined timelines for them.
- Defined KPI's for finding product-market fit
- Designed email sequences for active and inactive users and worked with copywriter to optimize email copy.
- Facilitated optimization of mobile website using my cross-functional experience.
- Researched crowdfunding and fellowships options
- Set up A/B tests on the website.

2021-04 -

2021-08

Software Developer Intern

Creating Futures, Remote

- Used Django's Rest Framework, Chatterbot, JavaScript, DTL(Django Templating language) to create chat-bot that can optionally work offline to help students learn conversational English, and integrated it with rest of application.
- Built learning module for students to practice their writing skills leveraging DOM manipulation and session storage in browser and integrated it with rest of application.
- Gathered business requirements and built prototypical system using Django's import-export module that would assist learners living in areas with limited internet connectivity update information in server asynchronously.
- Collaborated with other developers to identify and alleviate number of bugs and errors in software.
- Featured in organization's newsletter for my contributions.

2021-03 -
2021-06

Coding Instructor

Tekie, Remote

- Handling B2B programming mentoring session for premier schools in Delhi(DPS Ujjain, Swiss Cottage) using Python and Scratch(block based programming).
- Taught and pitched product to B2B2C clients, which include some of top schools in India, in addition to B2C clients.

Education

2018-06 -
2022-06

Bachelor of Technology: Electrical, Electronics And Communications Engineering

SRM Institute of Science And Technology - Chennai

Certifications

2020-12

Coursera- Mathematics for Machine Learning (UCL)-
Linear Algebra

2021-04

Coursera-Mathematics for Machine Learning:
Multivariate Calculus

Projects

Portfolio Website: Portfolio with my projects and Github repositories. (Link: <https://nandannishad.netlify.app/>)

Stock Market Dashboard: Built a stock market dashboard with prediction capabilities using Dash, Python, YFinance API (for stock data) and Facebook's Prophet API (for prediction). Github: (github.com/Nandan42/Stock-Market-Dashboard)

Ticket Manager:Full stack application with CRUD functionality built using the MERN(MongoDB Atlas, Express, React and Node) stack to allow users to manage tasks. Authentication feature currently under

development.

Resume Builder: Built an online resume builder using Node, React and Express while also using the html-pdf package.
